CONTENTS—MARCH 2009

Obituary—

Isaiah Daniel (I. D.) Russell 1

Regular Articles—

Spatial Distribution of Free-of-Charge Pathology Submissions to the California Animal Health and Food Safety Laboratories During the Exotic Newcastle Outbreak in 2002–2003. Gustavo Soberano, Tim E. Carpenter, Carol Cardona, and Bruce Charlton 2

Vaccine-Induced Protection from Egg Production Losses in Commercial Turkey Breeder Hens Following Experimental Challenge with a Triple-Reassortant H3N2 Avian Influenza Virus. Darrell R. Kapczynski, Eric Gonder, Karen Liljebjelke, Ron Lippert, Daniel Petkov, and Becky Tilley 7

Reduced Egg Production in Hens Associated with Avian Influenza Vaccines and Formalin Levels. Di Meng, Zhang Hui, Jianming Yang, Jilei Yuan, Yong Ling, and Cheng He 16

Histopathology and Serum Clinical Chemistry Evaluation of Broilers with Femoral Head Separation Disorder. V. Durairaj, R. Okimoto, K. Rasaputra, F. D. Clark, and N. C. Rath 21

Survival of Avian Influenza and Newcastle Disease Viruses in Compost and at Ambient Temperatures Based on Virus Isolation and Real-Time Reverse Transcriptase PCR. J. Guan, M. Chan, C. Grenier, D. C. Wilkie, B. W. Brooks, and J. L. Spencer 26

Ceramic Powder Made from Chicken Feces: Anti-Viral Effects Against Avian Influenza Viruses. Kazuaki Takehara, Omoto Chinen, Alam Jahangir, Yuki Miyoshi, Yuichi Ueno, Shuhei Ueda, Yukako Takada, Sakchai Ruenphet, Ken-ichiro Mutoh, Masashi Okamura, and Masayuki Nakamura 34

Comparison of Viral Shedding Following Vaccination with Inactivated and Live Newcastle Disease Vaccines Formulated with Wild-Type and Recombinant Viruses. Patti J. Miller, Carlos Estevez, Qingzhong Yu, David L. Suarez, and Daniel J. King 39

Strain-Specific Virulence of *Bordetella hinzii* in Poultry. Karen B. Register and Robert A. Kunkle 50

Human Contacts and Potential Pathways of Disease Introduction on Georgia Poultry Farms. Antonio R. Vieira, Charles L. Hofacre, John A. Smith, and Dana Cole 55

Factors Influencing the Attenuation of Serotype 1 Marek's Disease Virus by Serial Cell Culture Passage and Evaluation of Attenuated Strains for Protection and Replication. Ekaterina Dudnikova, Anatoly Vlasov, Svetlana Norkina, Dmitry Kireev, and Richard L. Witter 63

Development of a Real-Time Polymerase Chain Reaction Assay for the Simultaneous Detection of *Mycoplasma gallisepticum* and *Mycoplasma synoviae* Under Industry Conditions. Robin Jarquin, Joseph Schultz, Irene Hanning, and Steven C. Ricke 73

Pathogenicity of Infectious Bursal Disease Virus Variant AL2 in Young Chickens. H. Toro, J. C. Effler, F. J. Hoerr, and F. W. van Ginkel 78

Development of a Polymerase Chain Reaction Procedure for Detection of Chicken and Turkey Parvoviruses. Laszlo Zsak, Keith O. Strother, and J. Michael Day 83

Antimicrobial Susceptibility and Resistance of Chicken *Escherichia coli*, *Salmonella* spp., and *Pasteurella multocida* Isolates. Tzu-Ming Huang, Tsang Long Lin, and Ching Ching Wu 89

Effects of Chicken Anemia Virus and Infectious Bursal Disease Virus in Commercial Chickens. H. Toro, V. L. van Santen, F. J. Hoerr, and C. Breedlove 94

The Development of Diagnostic Real-Time TaqMan PCRs for the Four Pathogenic Avian Mycoplasmas. Ziv Raviv and Stanley H. Kleven 103

Use of Random Amplified Polymorphic DNA Analysis and Single-Enzyme Amplified Fragment Length Polymorphism in Molecular Typing of *Ornithobacterium rhinotracheale* Strains. Chung-Hsi Chou, Shin-Ying Lin, Chiou-Lin Chen, and Hsiang-Jung Tsai 108

Research Notes—

Hemagglutinating Activity of *Gallibacterium* Strains. A. Zepeda, S. Ramírez, V. Vega, V. Morales, M. Talavera, C. Salgado-Miranda, J. Simón-Martínez, A. M. Bojesen, and E. Soriano-Vargas 115

Massachusetts Live Vaccination Protects Against a Novel Infectious Bronchitis Virus S1 Genotype DMV/5642/06. M. K. Wood, B. S. Ladman, L. A. Preskenis, C. R. Pope, D. A. Bautista, and J. Gelb Jr. 119

Molecular Variability of DR-1 and DR-2 Within the *pvpA* Gene in *Mycoplasma gallisepticum* Isolates. Hong-Xia Jiang, Ji-Rong Chen, Hua-Ling Yan, Xu-Ning Li, Zhang-Liu Chen, and Zhen-Ling Zeng 124

Case Reports—

An Outbreak of West Nile Virus Infection in Captive Lesser Scaup (*Aythya affinis*) Ducklings. Chelsea G. Himsworth, Kirsty E. B. Gurney, Aleksjia S. Neimanis, Gary A. Wobeser, and Fredrick A. Leighton 129

Isolation of *Salmonella* Typhimurium from Dead Blue and Gold Macaws (*Ara ararauna*). Germán B. Vigo, Javier Origlia, Daniel Gornatti, Miguel Piscopo, Angela Salve, María I. Caffer, Mariana Pichel, Norma Binsztein, and Gerardo A. Leotta 135

Respiratory Tract Trichomoniasis in Breeder Squab Candidates in Northern California. S. T. Stoute, B. R. Charlton, A. A. Bickford, and M. C. Bland 139

Malignant Seminoma with Multiple Visceral Metastases in a Guinea Fowl (*Numida meleagris*) Kept in a Zoo. H. M. Golbar, T. Izawa, M. Kuwamura, M. Yonezawa, S. Ito, and J. Yamate 143

Guidelines for Authors 146

Erratum 147

CONTENTS—JUNE 2009

Regular Articles—

Latency of Marek's Disease Virus (MDV) in a Reticuloendotheliosis Virus–Transformed T-Cell Line. I: Uptake and Structure of the Latent MDV Genome. Vaithilingaraja Arumugaswami, Pankaj M. Kumar, Vjollca Konjufca, Robert L. Dienglewicz, Sanjay M. Reddy, and Mark S. Parcells 149

Latency of Marek's Disease Virus (MDV) in a Reticuloendotheliosis Virus–Transformed T-Cell Line. II: Expression of the Latent MDV Genome. Vaithilingaraja Arumugaswami, Pankaj M. Kumar, Vjollca Konjufca, Robert L. Dienglewicz, Sanjay M. Reddy, and Mark S. Parcells 156

Avian Spirochetosis in Chickens Following Experimental Transmission of *Borrelia anserina* by *Argas* (*Persicargas*) *miniatus*. Raquel S. Lisbôa, Rafaella C. Teixeira, Charles P. Rangel, Huarrisson A. Santos, Carlos L. Massard, and Adivaldo H. Fonseca 166

Protection Against Fowl Cholera Conferred by Vaccination with Recombinant *Pasteurella multocida* Filamentous Hemagglutinin Peptides. Fred M. Tatum, Louisa B. Tabatabai, and Robert E. Briggs 169

Infectious Bronchitis Virus Field Vaccination Coverage and Persistence of Arkansas-Type Viruses in Commercial Broilers. Mark W. Jackwood, Deborah A. Hilt, Amber W. McCall, Crystal N. Polizzi, Enid T. McKinley, and Susan M. Williams 175

Longitudinal Survey of Avian Metapneumoviruses in Poultry in Israel: Infiltration of Field Strains into Vaccinated Flocks. Caroline Banet-Noach, Lubov Simanov, Nihay Laham-Karam, Shimon Perk, and Eran Bacharach 184

Vaccination with Newcastle Disease Virus Vectored Vaccine Protects Chickens Against Highly Pathogenic H7 Avian Influenza Virus. Diana Schröer, Jutta Veits, Christian Grund, Malte Dauber, Günther Keil, Harald Granzow, Thomas C. Mettenleiter, and Angela Römer-Oberdörfer 190

Serologic Evidence of Prevalent Avian H3 Subtype Influenza Virus Infection in Chickens. Juan Pu, Guo-zhong Zhang, Ji-hong Ma, Ying-ju Xia, Qin-fang Liu, Zhan-lei Jiang, Zhe Wang, Earl G. Brown, Fu-lin Tian, and Jin-hua Liu 198

Serologic Response Against Fowl Poxvirus and Reticuloendotheliosis Virus After Experimental and Natural Infections of Chickens with Fowl Poxvirus. R. Hauck, C. Prusas, H. M. Hafez, and D. Lüschow 205

Quantitative PCR as a Tool to Determine the Reticuloendotheliosis Virus–Proviral Load of Fowl Poxvirus. R. Hauck, C. Prusas, H. M. Hafez, and D. Lüschow 211

Rapid, Sensitive, and Specific Detection of the O4 Group of *Salmonella enterica* by Loop-Mediated Isothermal Amplification. Masashi Okamura, Yousuke Ohba, Shuichi Kikuchi, Kazuaki Takehara, Masanari Ikedo, Tadashi Kojima, and Masayuki Nakamura 216

Surveillance for High Pathogenicity Avian Influenza Virus in Wild Birds in the Pacific Flyway of the United States, 2006–2007. Robert J. Dusek, J. Bradley Bortner, Thomas J DeLiberto, Jenny Hoskins, J. Christian Franson, Bradley D. Bales, Dan Yparraguirre, Seth R. Swafford, and Hon S. Ip 222

Systemic Histomoniasis Associated with High Mortality and Unusual Lesions in the Bursa of Fabricius, Kidneys, and Lungs in Commercial Turkeys. Gabriel Sentíes-Cué, R. P. Chin, andH. L. Shivaprasad 231

Experimental West Nile Virus Infection in Aigamo Ducks, a Cross Between Wild Ducks (*Anas platyrhynchos*) and Domestic Ducks (*Anas platyrhynchos* var. *domesticus*). Hiroaki Shirafuji, Katsushi Kanehira, Masanori Kubo, Tomoyuki Shibahara, and Tsugihiko Kamio 239

Vaccination of Chickens with Liposomal Inactivated Avian Pathogenic *Escherichia coli* (APEC) Vaccine by Eye Drop or Coarse Spray Administration. K. Yaguchi, T. Ohgitani, T. Noro, T. Kaneshige, and Y. Shimizu 245

Aerosol Spray Treatment with Bacteriophages and Competitive Exclusion Reduces *Salmonella* Enteritidis Infection in Chickens. C. Borie, M. L. Sánchez, C. Navarro, S. Ramírez, M. A. Morales, J. Retamales, and J. Robeson 250

Pap Mutant of Avian Pathogenic *Escherichia coli* O1, an O1:K1:H7 Strain, Is Attenuated *In Vivo*. Subhashinie Kariyawasam and Lisa K. Nolan 255

CpG Oligodeoxynucleotides Activate Innate Immune Response that Suppresses Infectious Bronchitis Virus Replication in Chicken Embryos. Arshud Dar, Andy Potter, Suresh Tikoo, Volker Gerdts, Ken Lai, Lorne A. Babiuk, and George Mutwiri 261

A Retrospective Study on Poult Enteritis Syndrome in Minnesota. Naresh Jindal, Devi P. Patnayak, Andre F. Ziegler, Alfonso Lago, and Sagar M. Goyal 268

An Evaluation of Avian Influenza Diagnostic Methods with Domestic Duck Specimens. Erica Spackman, Mary J. Pantin-Jackwood, David E. Swayne, and David L. Suarez 276

Efficacy of a Novel Trivalent Inactivated Vaccine Against the Shedding of *Salmonella* in a Chicken Challenge Model. Kazuhiro Deguchi, Eriko Yokoyama, Takashi Honda, and Kyosuke Mizuno 281

A Deletion Within Glycoprotein L of Marek's Disease Virus (MDV) Field Isolates Correlates with a Decrease in Bivalent MDV Vaccine Efficacy in Contact-Exposed Chickens. Phaedra Tavlarides-Hontz, Pankaj M. Kumar, Juliana Rojas Amortegui, Nikolaus Osterrieder, and Mark S. Parcells 287

Research Notes—

Effect of the Major Histocompatibility Complex on the Inhibition of Induced Cellulitis Development in the Broiler Chicken Model. K. S Macklin, R. A. Norton, and S. J. Ewald 297

Prevalence of *Eimeria* Species in Broilers with Subclinical Signs from Fifty Farms. X. M. Sun, W. Pang, T. Jia, W. C. Yan, G. He, L. L. Hao, Marcos Bentué, and X. Suo 301

Molecular Characterization of Pakistani Field Isolates of Infectious Bursal Disease Virus. Nazir Ahmed Lone, Shafqat Fatima Rehmani, Shahana Urooj Kazmi, Rana Muzaffar, Taseer Ahmed Khan, Adnan Khan, Shakeel Ahmed Khan, and Ayaz Ahmed 306

Case Reports—

Aeromonas Species Associated with Necrotizing Enteritis and Septicemia in an Adult Male Ostrich (*Struthio camelus*). M. França, R. L. Walker, R. Kokka, and H. L. Shivaprasad 310

Isolation and Identification of Duck Adenovirus 1 in Ducklings with Proliferative Tracheitis in Ontario. Marina L. Brash, Janet N. Swinton, Alexandru Weisz, and Davor Ojkić 317

The Diagnosis of Very Virulent Infectious Bursal Disease in California Pullets. Simone T. Stoute, Daral J. Jackwood, Susan E Sommer-Wagner, George L. Cooper, Mark L. Anderson, Peter R. Woolcock, Arthur A. Bickford, C. Gabriel Sentíes-Cué, and Bruce R. Charlton 321

Erratum 327

Guidelines for Authors 328

CONTENTS—SEPTEMBER 2009

Regular Articles—

Molecular Characterization of Chicken Infectious Anemia Virus Circulating in Argentina During 2007. M. I. Craig, A. Rimondi, M. Delamer, P. Sansalone, G. König, A. Vagnozzi, and A. Pereda 331

Selection for Increased Nitric Oxide Production Does Not Increase Resistance to Marek's Disease in a Primary Broiler Breeder Line. Celina Buscaglia, Priscilla H. O'Connell, Keith W. Jarosinski, Igal Pevzner, and Karel A. Schat 336

Full Genome Sequences of Two Reticuloendotheliosis Viruses Contaminating Commercial Vaccines. Qinfang Liu, Jixun Zhao, Jingliang Su, Juan Pu, Guozhong Zhang, and Jinhua Liu 341

Identification and Characterization of Two Distinct Bursal B-Cell Subpopulations Following Infectious Bursal Disease Virus Infection of White Leghorn Chickens. Daniel I. Petkov, Erich G. Linnemann, Darrell R. Kapczynski, and Holly S. Sellers 347

Detection and Molecular Characterization of Gene 3 and 5 of Turkey Coronavirus from Turkeys with Severe Enteritis in Brazil. Amarilis N. D'Elboux Bunger, Jorge Luis Chacón, Richard C. Jones, and Antonio J. Piantino Ferreira 356

Identification and Characterization of a Duck Enteritis Virus US3-Like Gene. Hong-Yi Xin, An-Chun Cheng, Ming-Shu Wang, Ren-Yong Jia, Chan-Juan Shen, and Hua Chang 363

Persistent Infection of Turkeys with an Avirulent Strain of Turkey Hemorrhagic Enteritis Virus. Nathan M. Beach, R. B. Duncan, C. T. Larsen, X. J. Meng, N. Sriranganathan, and F. W. Pierson 370

Toward the Development of a Plant-Based Vaccine Against Reovirus. Hongzhuan Wu, Karyn Scissum-Gunn, Narendra K. Singh, and Joseph J. Giambrone 376

Efficacy of Autogenous Killed Vaccine of *Avibacterium paragallinarum*. Kridda Chukiatsiri, Jiroj Sasipreeyajan, Wantanee Neramitmansuk, and Niwat Chansiripornchai 382

Establishment of an Aerosol-Based Marek's Disease Virus Infection Model. Mohamed Faizal Abdul-Careem, Abbas Javaheri-Vayeghan, Sangitha Shanmuganathan, Hamid Reza Haghighi, Leah R. Read, Kamran Haq, D. Bruce Hunter, Karel A. Schat, Mohammad Heidari, and Shayan Sharif 387

Application of Aluminum Hydroxide for an *In Ovo* Live Newcastle Disease Vaccine. Hideyuki Ohta, Shinsuke Ezoe, Kenichi Yamazaki, Toru Kawai, and Takashi Honda 392

Induction of CXC Chemokine Messenger-RNA Expression in Chicken Oviduct Epithelial Cells by *Salmonella enterica* Serovar Enteritidis via the Type Three Secretion System–1. Shuhui Li,M. Zhenyu Zhang, Lifang Yan, Hyun Lillehoj, Lanny W. Pace, and Shuping Zhang 396

Sensitivity of Isolates of *Eimeria* from Turkey Flocks to the Anticoccidial Drugs Amprolium, Clopidol, Diclazuril, and Monensin. T. Rathinam and H. D. Chapman 405

Immunization of Broiler Chickens Against *Clostridium perfringens*–Induced Necrotic Enteritis Using Purified Recombinant Immunogenic Proteins. Yanfen Jiang, Raveendra R. Kulkarni, Valeria R. Parreira, and John F. Prescott 409

Effect of Dosage and Vaccination Route on Transmission of a Live Attenuated *Mycoplasma gallisepticum* Vaccine: A Broiler Model. J. D. Evans, S. L. Branton, and S. A. Leigh 416

Cross-Protection Between West Nile and Japanese Encephalitis Viruses in Red-Winged Blackbirds (*Agelaius phoeniceus*). Nicole M. Nemeth, Angela M. Bosco-Lauth, and Richard A. Bowen 421

Characterization of New Variants of Avian Infectious Bronchitis Virus in Tunisia. Hager Bourogàa, Khaled Miled, Latifa Gribâa, Imen El Behi, and Abdeljelil Ghram 426

Apoptosis Induced by Duck Reovirus p10.8 Protein in Primary Duck Embryonated Fibroblast and Vero E6 Cells. Hongwei Geng, Yun Zhang, Yin Liu-Partanen, Vanhanseng, Dongchun Guo, Yu Wang, Ming Liu, and Guangzhi Tong 434

Evaluation of PCR and DNA Sequencing for Direct Detection of *Clostridium perfringens* in the Intestinal Tract of Broilers. Maya Henriksen, Magne Bisgaard, Maria Francesch, Irene Gabriel, and Henrik Christensen ... 441

Research Notes—

Molecular Characterization of Brazilian Infectious Bursal Disease Virus Isolated from 1997 to 2005. Maria Judite B. Fernandes, Isabela C. Simoni, Maria Gabriela Vogel, Ricardo Harakava, Eliana B. Rivas, Maria Beatriz C. Oliveira, Ana M. I. Kanashiro, Eliana N. C. Tessari, Nilce M. S. Q. Gama, and Clarice W. Arns 449

Serologic Evidence of Avian Influenza (H4N6) Exposure in a Wild-Caught Raccoon. Nathan M. Roberts, David J. Henzler, and Larry Clark 455

Declining Mortality in American Crow (*Corvus brachyrhynchos*) Following Natural West Nile Virus Infection. Lisa M. Reed, Michael A. Johansson, Nicholas Panella, Robert McLean, Terry Creekmore, Rose Puelle, and Nicholas Komar 458

Serotyping of *Avibacterium paragallinarum* Isolates from Peru. Alfredo Mendoza-Espinoza, Horacio R. Terzolo, Rosa I. Delgado, Amparo I. Zavaleta, Ysabel Koga, and Yosef D. Huberman 462

Case Reports—

Characterization of Atherosclerosis by Histochemical and Immunohistochemical Methods in African Grey Parrots (*Psittacus erithacus*) and Amazon Parrots (*Amazona* spp.). Cornelia Fricke, Volker Schmidt, Kerstin Cramer, Maria-Elisabeth Krautwald-Junghanns, and Gerry M. Dorrestein 466

Atoxoplasmosis in Canary Fledglings: Severe Lymphocytic Enteritis with Preferential Parasitism of B Lymphocytes. William R. Maslin and Kenneth S. Latimer 473

Subject Index, 2009

A

Aeromonas sp.
and necrotizing enteritis and septicemia in an ostrich, 310
aerosol-based infection model
for Marek's disease, 387
aerosol spray
of bacteriophages to reduce *Salmonella* Enteritidis infections, 250
African grey parrot
characteristics of atherosclerotic changes, 466
Agelaisus phoeniceus
cross-protection between West Nile and Japanese encephalitis viruses, 421
aigamo ducks
experimental infection with West Nile virus, 239
Alectoris chukar
with histomonosis and capillarid infection, 637
alphaherpesvirus
detection of infectious laryngotracheitis virus, 618
aluminum hydroxide
use in Newcastle disease *in ovo* vaccination, 392
aluminum hydroxide gel
use as adjuvant in vaccine for infectious coryza, 382
Amazon parrots
characteristics of atherosclerotic changes, 466
Amazona spp.
characteristics of atherosclerotic changes, 466
American crow
declining mortality due to West Nile virus, 458
amplified fragment length polymorphism, single enzyme
for typing *Ornithobacterium rhinotracheale* strains, 108
amprolium
sensitivity of *Eimeria* isolates, 405
Anas platyrhynchos var. *domesticus*
experimental infection with West Nile virus, 239
antibiotic sensitivity
of poult enteritis syndrome in turkey poults, 268
antibiotic susceptibility
of *Riemerella anatipestifer* field isolates, 601
antibodies
detection of parvovirus in chickens using ELISA, 585
to avian bornavirus in macaws, 568
antibody titers
using ELISA to diagnose aspergillosis in various species, 491
antimicrobial susceptibility and resistance
of various bacteria in chickens, 89
apoptosis
mediated by duck reovirus p10.8 protein in cells, 434
Ara ararauna
isolation of *Salmonella* Typhimurium, 135
Arabidopsis thaliana
use in edible vaccine for reovirus, 376
Argas miniatus
experimental transmission of spirochetes to chickens, 166
Argentina
molecular characterization of chicken infectious anemia virus isolates, 331
Aspergillus spp.
measure of antibody levels in various species using ELISA, 491
astrovirus
in poult enteritis syndrome, 517
atherosclerosis
in African grey parrot and Amazon parrots, 466
Atoxoplasma serini
and B lymphocytes in canaries, 473
attenuation
of Marek's disease virus by serial cell culture passage, 63
of *pap* mutant in avian pathogenic *E. coli*, 255
avian influenza (AI)
evaluation of diagnostic methods in ducks, 276
formalin level in vaccines and loss of egg production, 16
monitoring white storks in Germany, 578
vaccine protects against lower egg production in turkeys, 7
avian influenza vaccine, low pathogenicity H5
efficacy of replikin peptide vaccine, 613
avian influenza, H5N1
replikin peptide vaccine, 613
avian influenza virus
antiviral effects of chicken feces ceramic powder, 34
survival in compost and at ambient temperatures, 26
avian influenza virus, H3
serologic evidence of prevalence in chickens, 198
avian influenza viruses, H4
biologic characterization from wild birds, 552
avian influenza virus, H4N6
wild raccoon as a reservoir, 455
avian influenza viruses, H6
biologic characterization from wild birds, 552
avian influenza viruses, H9
biologic characterization from wild birds, 552
avian influenza virus, highly pathogenic
surveillance in wild birds of the U.S. Pacific Flyway, 222
avian influenza virus, highly pathogenic H7
protection using Newcastle disease virus-vectored vaccine, 190
avian influenza virus, low pathogenicity
replikin peptide vaccine, 613
avian influenza virus, low pathogenicity
characterization of H4, H6, and H9 types from wild birds, 552
avian metapneumovirus
infiltration of field strains into vaccinated flocks in Israel, 184
Avibacterium paragallinarum
efficacy of killed autogenous vaccine, 382
serotypes in Peru, 462
Aythya affinis
West Nile virus outbreak in Canada, 129

B

B lymphocytes
kinetics in the bursa and spleen, 347
preferential parasitism by *Atoxoplasma* sp., 473
response of two subpopulations to infectious bursal disease, 347
backyard flocks
surveillance during exotic Newcastle disease outbreak, 2
bacteriophages
and competitive exclusion product reduce *Salmonella* infection, 250
biosecurity
potential pathways for disease introduction, 55
strategies for controlling infectious laryngotracheitis outbreaks, 574
wild raccoons as a source of avian influenza, 455
blue and gold macaws
isolation of *Salmonella* Typhimurium, 135
Bordetella hinzii
virulence of strains in various poultry, 50
bornavirus
occurrence in healthy macaws, 568
Borrelia anserina
experimental transmission to chickens by *Argas* sp., 166
Bradyspira intermedia
in layer flocks in Pennsylvania, 533
Brachyspira pilosicoli
in layer flocks in Pennsylvania, 533
Brazil
characterization of infectious bursal disease strains, 449
molecular characterization and detection of turkey coronavirus, 356
broiler breeders
nitric oxide and increased resistance to Marek's disease, 336
broilers

detection of *Clostridium perfringens* in intestines, 441
dosage and route for *M. gallisepticum* vaccination, 416
immunization against *Clostridium perfringens*, 409
infectious bronchitis virus vaccination persistence and coverage, 175
major histocompatibility complex types and cellulitis, 297
prevalence of different *Eimeria* sp. in China, 301
bursa of Fabricius
lesions from *Histomonas meleagridis* in turkeys, 231
two distinct subpopulations of B cells, 347

C

California
characterization of very virulent infectious bursal disease virus, 592
respiratory tract trichomoniasis in squabs, 139
strategies to control infectious laryngotracheitis outbreaks, 574
very virulent infectious bursal disease in pullets, 321
California Animal Health and Food Safety Laboratories
role during exotic Newcastle disease outbreak, 2
Canada
West Nile virus in lesser scaup, 129
canaries
atoxoplasmosis and B lymphocytes, 473
capillarid infections
in chukar, 637
CD4+ cells
and Marek's diseases virus latency, 149, 156
cellulitis
effect of major histocompatibility complex types, 297
ceramic powder
made from chicken feces and antiviral effects, 34, 327
characterization, molecular and pathogenic
of very virulent infectious bursal disease virus from California, 592
chemokines
response against *Salmonella enterica* in oviduct, 396
chicken anemia virus
coinfection with infectious bursal disease virus, 94
chicken infectious anemia virus
molecular characterization of Argentine isolates, 331
chickens
Avibacterium paragallinarum serotypes in Peru, 462
bacteriophages and competitive exclusion reduce *Salmonella* infections, 250
coinfection with chicken anemia and infectious bursal disease viruses, 94
detection of parvovirus antibodies, 585
etiology of femoral head separation disorder, 21
immunization against West Nile virus, 502
immunization using recombinant envelope protein, 502
liposomal-inactivated avian pathogenic *Escherichia coli* vaccine, 245
parvovirus detection using polymerase chain reaction assay, 83
pathogenicity of infectious bursal disease virus AL2, 78
prevalence of H3 avian influenza viruses in China, 198
spirochetosis transmitted by ticks, 166
susceptibility and resistance of bacteria, 89
very virulent infectious bursal disease isolated in California, 321
virulence of *Bordetella hinzii* strains, 50
China
losses in egg production after vaccination for AI, 16
prevalence of *Eimeria* sp. in broilers, 301
prevalence of H3 avian influenza viruses in chickens in China, 198
chorioallantoic membrane
in embryonated chicken eggs for isolating West Nile virus, 608
chukar
with histomonosis and capillarid infection, 637
Ciconia ciconia
monitoring for avian influenza, 578
clinical chemistry
etiology of femoral head separation disorder, 21
clopidol
sensitivity of *Eimeria* isolates, 405
Clostridium perfringens
direct detection by PCR and DNA sequencing, 441
immunization using recombinant immunogenic proteins, 409
use of organic acids for control, 441
coccidiosis
prevalence on broiler farms in China, 301
coinfections
chicken anemia and infectious bursal disease viruses in chickens, 94
colibacillosis
a liposomal-inactivated vaccines for broilers and layers, 245
pap mutant attenuation, 255
competitive exclusion product
and bacteriophages reduce *Salmonella* Enteritidis infection, 250
compost
survival of AI and Newcastle disease viruses, 26
Corvus brachyrhynchos
declining mortality due to West Nile virus, 458
Corvus ossifragus
mortality rate from West Nile virus, 458
CpG oligonucleotides
activate immune response against infectious bronchitis, 261
cross-protection
between West Nile and Japanese encephalitis viruses, 421

D

Danube River delta
occurrence of blood parasites in warblers, 634
diagnostic tests
evaluation of avian influenza virus detection in ducks, 276
for aspergillosis in various species, 491
parvovirus detection using PCR assay, 83
real-time TaqMan PCR assay for *Mycoplasma* spp., 103
SYBR green assay for *Mycoplasma* spp., 73
use of FTA cards for Marek's disease, 510
diclazuril
sensitivity of *Eimeria* isolates, 405
disinfectants
use of ceramic powder made from chicken feces, 34
DNA sequencing
use for direct detection of *Clostridium perfringens*, 441
downtime
extended to control infectious laryngotracheitis outbreaks on farms, 574
duck adenovirus 1
causes tracheitis in ducklings, 317
ducks, domestic
evaluation of diagnostic methods for avian influenza, 276
duck enteritis virus
identification and characterization of US3-like gene, 363
duck reovirus
p10.8 protein induces apoptosis in duck cells, 434

E

East Asia
experimental infection of ducks with West Nile virus, 239
egg production
losses due to avian influenza vaccines with formalin in layers, 16
protection against losses from AI in turkeys, 7
eggs, chicken
for isolating West Nile virus, 608
Eimeria sp.
prevalence of various species on Chinese farms, 301
sensitivity to anticoccidials in turkeys, 405
embryonated chicken eggs
isolation and distribution of West Nile virus, 608
enteric disease
parvovirus detection using polymerase chain reaction assay, 83
enteritis
molecular characterization of turkey coronavirus, 356
envelope protein, recombinant

use in immunization against West Nile virus, 502
enzyme-linked immunosorbent assay (ELISA)
for parvovirus antibodies in chickens, 585
measurement of *Aspergillus* antibody levels, 491
Escherichia coli
antimicrobial susceptibility and resistance, 89
effect of major histocompatibility complex on cellulitis, 297
in European starlings in Kansas, 544
stress-induced infections in turkeys, 495
Escherichia coli, avian pathogenic
a liposomal-inactivated vaccine for chickens, 245
Escherichia coli, avian pathogenic O1 strain
pap mutant attenuation, 255

F

feather shafts
detection of infectious laryngotracheitis virus, 618
feces
antiviral effects following sintering, 34
femoral head separation
histopathology and clinical chemistry evaluation, 21
filamentous hemagglutinin
use of *Pasteurella multocida* recombinant FHAB2 peptides as a vaccine, 169
fish crows
mortality rates from West Nile virus, 458
formalin
in AI vaccines and losses in egg production, 16
fowl cholera
recombinant vaccine using filamentous hemagglutinin peptides, 169
fowl poxvirus
multiplex quantitative polymerase chain reaction for REV-proviral load, 211
serologic response to infection in combination with reticuloendotheliosis virus, 205
FTA cards
use in diagnosis and vaccine monitoring for Marek's disease, 510

G

Gallibacterium sp.
hemagglutination activity of strains, 115
gene 3
molecular characterization of turkey coronavirus from Brazil, 356
gene 5
molecular characterization of turkey coronavirus from Brazil, 356
genetic cloning
of duck enteritis virus US3-like gene, 363
genomic sequence
for reticuloendotheliosis virus, 341
Germany
monitoring white storks for avian influenza, 578
glycoprotein L gene
deletion in Marek's disease virus and decreased vaccine efficacy, 287
functional role in Marek's disease virus, 287
growth depression
duration in poult enteritis syndrome, 517
guinea fowl
malignant seminoma with metastases, 143

H

hemagglutination activity
of *Gallibacterium* strains, 115
hemorrhagic enteritis virus
persistent infection by Virginia avirulent strain, 370
use as vector in live-virus vaccine, 370
herpesvirus latency
expression of latent Marek's disease genome in T cells, 156
uptake and structure of MDV genome in T cells, 149
Heterakis spp.
infection in chukar, 637
Histomonas meleagridis
lesions in turkey bursa of Fabricius, kidneys, and lungs, 231
in chukar, 637
histomoniasis, systemic
lesions in turkey bursa of Fabricius, kidneys, and lungs, 231,
humans
and spread of diseases between poultry farms, 55
humoral immune response
against fowl poxvirus and reticuloendotheliosis virus infection, 205

I

immune response
against infectious bronchitis activated by CpG oligonucleotides, 261
immunity
cross-protection between West Nile and Japanese encephalitis viruses, 421
immunization
against West Nile virus using recombinant envelope protein, 502
for necrotic enteritis using recombinant immunogenic proteins, 409
immunoglobulin levels
after infectious bursal disease infection, 347
in ovo vaccination
for Newcastle disease, 392
inducible nitric oxide synthase
and genetic resistance to Marek's disease, 336
infection model
aerosol-based for Marek's disease, 387
infectious anemia virus
molecular characterization of Argentine isolates, 331
infectious bronchitis virus
field vaccination coverage and persistence of Arkansas-type, 175
immune response *in ovo* activated by CpG oligonucleotides, 261
new variants in Tunisia, 426
infectious bronchitis virus S1 genotype
live Massachusetts strain vaccine, 119
vaccination against genotype DMV/5642/06, 119
infectious bursal disease variant E
vaccine using recombinant herpesvirus of turkey, 624
infectious bursal disease, very virulent
in California pullets, 321
infectious bursal disease virus
characterization of Brazilian isolates, 449
coinfection with chicken anemia virus, 94
molecular characterization of Pakistani isolates, 306
response of two bursal B-cell subpopulations, 347
infectious bursal disease virus variant AL2
pathogenicity in young chickens, 78
infectious bursal disease virus, very virulent
characteristics of rA and rB isolates in California outbreak, 592
infectious coryza
efficacy of killed autogenous vaccine, 382
serogroups present in Peru, 462
infectious laryngotracheitis
strategies for controlling outbreaks, 574
infectious laryngotracheitis virus
detection of wild and vaccine-types, 618
intestines
direct detection of *Clostridium perfringens*, 441
ionophores
use to control *Clostridium perfringens*, 441
Israel
infiltration of field strains of metapneumovirus into vaccinated flocks, 184

J

Japan
molecular typing of Mycoplasma synoviae strains, 538
Japanese encephalitis virus
cross-protection with West Nile virus, 421

K

Kansas
occurrence of pathogens in starlings, 544
kidneys
lesions from *Histomonas meleagridis* in turkeys, 231

L

laboratories, reference
role of state labs in monitoring backyard flocks, 2
layers
Bradyspira spp. in flocks in Pennsylvania, 533
lesser scaup
West Nile virus outbreak in Canada, 129
Listeria monocytogenes
stress-induced infections in turkeys, 495
loop-mediated isothermal amplification
for detecting *Salmonella enterica* O4, 216
Lophura swinhoii
infected with *Mycobacterium avium*, 629
lungs
lesions from *Histomonas meleagridis* in turkeys, 231
lymphocytic enteritis
in canaries caused by *Atoxoplasma serini*, 473

M

macaw wasting disease
bornaviruses in healthy macaws, 568
macaws
with avian bornavirus RNA and antibodies, 568
major histocompatibility complex
effect of different haplotypes on cellulitis development, 297
Marek's disease
aerosol-based infection model, 387
diagnosis and vaccine monitoring with FTA cards, 510
resistance and nitric oxide production in broiler breeders, 336
Marek's disease vaccine
validity of FTA Cards for monitoring, 510
Marek's disease vaccine, serotype 1
evaluation of attenuated strains, 63
Marek's disease virus
expression of genome during latency, 156
latency in REV-transformed T-cell lines, 149
Marek's disease virus, serotype 1
attenuation by serial cell culture passage, 63
Marek's disease virus, very virulent plus
deletion of glycoprotein G gene in field isolates, 287
metastasis
in malignant seminoma in Guinea fowl, 143
mineral oil
use as adjuvant in vaccine for infectious coryza, 382
Minnesota
poult enteritis syndrome in turkey poults, 268
molecular amplification
for detection of infectious laryngotracheitis virus, 618
molecular characterization
of Pakistani infectious bursal disease field strains, 306
molecular variability
in *pvpA* gene of *Mycoplasma gallisepticum*, 124
monensin
sensitivity of *Eimeria* isolates, 405
multidrug resistance
of *Riemerella anatipestifer* field isolates, 601
Muscovy duck reovirus
p10.8 protein induces apoptosis in duck cells, 434
Mycobacterium avium
in Swinhoe's pheasants, 629
Mycobacterium avium subsp. *paratuberculosis*
in European starlings in Kansas, 544
Mycoplasma gallisepticum
effect of dosage and route on vaccination efficacy, 416
genetic variability in *pvpA* gene, 124
real-time polymerase chain reaction assay, 73
Mycoplasma spp.
real-time TaqMan polymerase chain reaction assay, 103
Mycoplasma synoviae
molecular typing of Japanese field and vaccine strains, 538
real-time polymerase chain reaction assay, 73
myocarditis
and reovirus in turkey poults, 523

N

necrotic enteritis
direct detection by PCR and DNA sequencing, 441
immunization using recombinant immunogenic proteins, 409
use of organic acids for control, 441
necrotizing enteritis
with *Aeromonas* sp. in ostrich, 310
Newcastle disease, exotic
in California, 2002–2003, 2
Newcastle disease vaccines
in ovo technology using aluminum hydroxide, 392
viral shedding and different formulations, 39
Newcastle disease virus
survival in compost and at ambient temperatures, 26
Newcastle disease virus, recombinant
use as a vectored vaccine for highly pathogenic avian influenza, 190
Newcastle disease virus, velogenic
efficacy of recombinant NDVH7m vaccine, 190
nitric oxide
increased production in chickens and Marek's disease resistance, 336
Numida meleagris
malignant seminoma with metastases, 143

O

Ontario
tracheitis in ducklings caused by duck adenovirus 1, 317
Ornithobacterium rhinotracheale
methods for typing strains, 108
ostrich
Aeromonas sp. with necrotizing enteritis, 310
oviduct epithelial cells, chicken
chemokine response to *Salmonella* infection, 396

P

p10.8 protein
from Muscovy duck reovirus induces apoptosis in cells, 434
Pacific flyway
surveillance for highly pathogenic avian influenza, 222
Pakistan
field isolates of infectious bursal disease viruses, 306
pap mutant
attenuated in avian pathogenic *E. coli* O1, 255
paramyxovirus
viral shedding after vaccination, 39
parasites, blood
infection rate in warblers in Danube River delta, 634
parvoviruses
detection using polymerase chain reaction assay, 83
enzyme-linked immunosorbent assay for antibodies in chickens, 585
Pasteurella multocida
antimicrobial susceptibility and resistance, 89
use of filamentous hemagglutinin peptides in recombinant vaccine, 169
pathogen shedding
duration in poult enteritis syndrome, 517
pathogenicity
of infectious bursal disease virus AL2 in chickens, 78
of very virulent infectious bursal disease virus from California, 592
pathology

etiology of femoral head separation disorder, 21
pathology submissions
during exotic Newcastle disease outbreak in California, 2
Pennsylvania
occurrence of *Bradyspira* spp. in layers, 533
Peru
Avibacterium paragallinarum serotypes, 462
phylogenetic analysis
of *Ornithobacterium rhinotracheale* strains, 108
pigeon canker
in respiratory tract of squabs, 139
pigeons
trichomoniasis in respiratory tract, 139
polymerase chain reaction
use for direct detection of *Clostridium perfringens*, 441
poptin
duck reovirus protein p10.8, 434
poult enteritis syndrome
duration of growth depression and pathogen shedding, 517
in turkey poults in Minnesota, 268
poultry farms
survey of potential pathways for disease spread, 55
Procyon lotor
as a reservoir of H4N6 avian influenza, 455
protection
against Arkansas-type infectious bronchitis virus with field vaccination, 175
proventricular dilatation disease
bornaviruses in healthy macaws, 568
Psittaciformes
diagnosis of aspergillosis using ELISA, 491
Psittacus erithacus
characteristics of atherosclerotic changes, 466
pulsed-field gel electrophoresis
for molecular typing of *Mycoplasma synoviae*, 538
pvpA gene
molecular variability of DR-1 and DR-2 region, 124
pyelonephritis-associate pili (Pap) fimbriae
role in avian pathogenic *E. coli* pathogenesis, 255

Q

quantitative multiplex real-time polymerase chain reaction
for determining reticuloendotheliosis virus-proviral load in fowl poxvirus, 211

R

raccoon
as a reservoir of H4N6 avian influenza, 455
random amplified polymorphic DNA analysis
for typing *Ornithobacterium rhinotracheale* strains, 108
real-time polymerase chain reaction assay
for *Mycoplasma gallisepticum* and *M. synoviae*, 73
real-time TaqMan polymerase chain reaction assay
for four *Mycoplasma* spp., 103
recombinant herpesvirus of turkey
use in infectious bursal disease vaccine, 624
recombinant immunogenic proteins
use in immunization for necrotic enteritis, 409
red-winged blackbirds
cross-protection between West Nile and Japanese encephalitis viruses, 421
reovirus
and myocarditis in turkey poults, 523
development of a plant-based vaccine, 376
replikin peptide vaccine
for low pathogenicity H5 avian influenza, 613
respiratory tract
trichomoniasis in squabs, 139
reticuloendotheliosis virus
full genomic sequence found contaminating vaccines, 341
in Marek's disease and fowl poxvirus vaccines, 341
serologic response in combination with fowl poxvirus to infection, 205
multiplex quantitative polymerase chain reaction for proviral load, 211
reticuloendotheliosis virus (REV)-transformed T-cell line
and latency of Marek's disease virus, 149
expression of latent Marek's disease virus genome, 156
rfbJ gene
use in detecting *Salmonella enterica* O4, 216
Riemerella anatipestifer
antibiotic susceptibility, 601
rotavirus
in poult enteritis syndrome, 517

S

Salmonella enterica O4
detection using loop-mediated isothermal amplification, 216
Salmonella Enteritidis
chemokine response in host oviduct, 396
siderophore receptor proteins and virulence, 563
treatment with bacteriophages and competitive exclusion reduced infections, 250
trivalent inactivated vaccine to prevent shedding, 281
Salmonella Infantis
trivalent inactivated vaccine to prevent shedding, 281
Salmonella spp.
antimicrobial susceptibility and resistance, 89
in European starlings in Kansas, 544
in poult enteritis syndrome, 517
Salmonella Typhimurium
isolated in blue and gold macaws, 135
trivalent inactivated vaccine to prevent shedding, 281
seminoma, malignant
with metastases in a Guinea fowl, 143
septicemia
and necrotizing enteritis in an ostrich, 310
sequence analysis
of Brazilian infectious bursal disease strains, 449
Serinus canarius
atoxoplasmosis and B lymphocytes, 473
serologic response
to fowl poxvirus and reticuloendotheliosis virus infection, 205
serologic surveillance
H3 avian influenza virus in chickens in China, 198
seroprevalence
of West Nile virus antibodies in crows, 458
serotypes
new variants of Tunisian infectious bronchitis virus, 426
siderophore receptor IroN
for protection against *Salmonella* infections, 563
siderophore receptor proteins
and virulence of *Salmonella* Enteritidis, 563
spirochetosis
Bradyspira infection found in layers, 533
transmission by ticks to chickens, 166
starling, European
occurrence of pathogens in Kansas feedlots, 544
stress
E. coli and *Listeria* co-infections in turkeys, 495
Struthio camelus
Aeromonas sp. with necrotizing enteritis, 310
Sturnus vulgaris
occurrence of pathogens in Kansas feedlots, 544
survey
potential pathways for disease spread on poultry farms, 55
surveillance
for highly pathogenic avian influenza in U.S. Pacific Flyway, 222
H3 avian influenza virus in chickens in China, 198
Swinhoe's pheasants
infected with *Mycobacterium avium*, 629

SYBR green assay
for *Mycoplasma gallisepticum* and *M. synoviae*, 73

T

T cells
expression of latent Marek's disease virus genome, 156
uptake and structure of latent Marek's diseases virus genome, 149
temperature
survival of AI and Newcastle disease viruses in litter, 26
ticks
transmission of spirochetes to chickens, 166
tracheitis
in ducklings caused by duck adenovirus 1, 317
transgenic plants
development of edible vaccines, 376
Trichomonas gallinae
in respiratory tract of squabs, 139
triple reassortant H3N2 avian influenza virus
vaccine protects against lower egg production in turkeys, 7
tuberculosis
in Swinhoe's pheasants, 629
Tunisia
new variants of infectious bronchitis virus, 426
turkey breeder hens
losses in egg production due to AI, 7
turkey coronavirus
molecular characterization of gene 3 and 5 from Brazil, 356
turkey poults
myocarditis associated with reoviruses, 523
poult enteritis syndrome in Minnesota, 268
turkeys
avirulent strain of hemorrhagic enteritis, 370
lesions caused by *Histomonas meleagridis*, 231
parvovirus detection using polymerase chain reaction assay, 83
sensitivities of *Eimeria* isolates to anticoccidial drugs, 405
stress and *E. coli* and *Listeria* co-infections, 495
virulence of *Bordetella hinzii* strains, 50
type three secretion system
role in *Salmonella* infection of host oviduct cells, 396

U

US3-like gene
characterization and identification in duck enteritis virus, 363

V

vaccination
and other strategies to control infectious laryngotracheitis, 574
for new variants of infectious bronchitis in Tunisia, 426
use of live Massachusetts strain of IB virus, 119
using Newcastle disease virus-vectored vaccine against H7 HPAI, 190
viral shedding after Newcastle disease vaccines, 39
vaccination administration
for *Mycoplasma gallisepticum* in broilers, 416
vaccination, field boost
persistence and coverage for Arkansas-type infectious bronchitis virus, 175
vaccine
contaminated with reticuloendotheliosis virus, 341
effect of dosage and method for *Mycoplasma gallisepticum*, 416
effect of glycoprotein G deletion in Marek's disease virus field strains, 287
evaluation of attenuated Marek's disease viruses, 63
for AI protects against turkey egg production losses, 7
for *Avibacterium paragallinarum*, 382
live and inactivated Newcastle disease, 39
monitoring Marek's disease vaccines with FTA cards, 510
replikin peptide vaccine for H5 low pathogenicity avian influenza, 613
use of IroN against *Salmonella* infections, 563
use of recombinant herpesvirus of turkey for infectious bursal disease, 624
wild-type and recombinant Newcastle disease, 39
vaccine, *in ovo*
for Newcastle disease, 392
vaccine, liposomal inactivated
for avian pathogenic *Escherichia coli*, 245
vaccine, plant-based
for reoviruses, 376
vaccine, recombinant
use of *Pasteurella multocida* filamentous hemagglutinin peptides, 169
vaccine strain
infiltration of field strains of metapneumovirus into vaccinated flocks, 184
vaccine, trivalent inactivated
prevents shedding of *Salmonella*, 281
VAXXITEK vaccine
for infectious bursal disease, 624
viral persistence
of avirulent strain of turkey hemorrhagic enteritis, 370
viral shedding
after various Newcastle disease vaccination, 39
virulence
of *Bordetella hinzii* strains, 50
vlhA gene sequencing
for molecular typing of *Mycoplasma synoviae*, 538
VP1 nucleotide sequence
in Argentine chicken anemia virus isolates, 331

W

warblers, Old World
occurrence of blood parasites in Danube River delta, 634
waterfowl, domestic
West Nile infection, 239
West Nile virus
cross-protection with Japanese encephalitis virus, 421
declining mortality in American crows, 458
evaluation of diagnostic methods for avian influenza, 276
experimental infection of domestic aigamo ducks in East Asia, 239
immunization using recombinant envelope protein in chickens, 502
in a captive lesser scaup, 129
isolation in embryonated chicken eggs, 608
white storks
monitoring for avian influenza, 578
wild birds
biologic characterization of low pathogenicity avian influenza viruses, 552
surveillance for highly pathogenic avian influenza in Pacific Flyway, 222
